JOHN BANDA

Information Technology Graduate | Software Development | IT Support and Systems

Kitwe, Zambia | jb938047@gmail.com | +260 967 386 441 | Open to relocation within Zambia

PROFESSIONAL SUMMARY

Results-driven Information Technology graduate (BSc IT, Zambia University of Technology, 2026) who builds working software for real Zambian problems. Designed DiaSmart, a personalized diabetes management system powered by reinforcement learning, and developed ZambiaPOS, a full-stack point-of-sale and inventory system for Zambian businesses. Combines strong foundations in programming, databases, networking, and information security with hands-on troubleshooting skills, customer-facing experience from running a business from 2022 to 2026, and freelance design work. Quick learner who communicates clearly and delivers independently. Seeking an entry-level or graduate role where technical ability and initiative can add immediate value.

CORE SKILLS

- **Software Development:** Python, JavaScript, Node.js, Express, React, HTML, CSS, Tailwind CSS, Object-Oriented Programming, Data Structures and Algorithms
- **Databases and Data:** MongoDB, PostgreSQL, SQL, database design, Big Data concepts, machine learning (reinforcement learning)
- **IT Support and Networking:** hardware and software troubleshooting, networking and system administration, data communications, technical documentation
- **Systems and Project Delivery:** systems analysis and design, IT project management, enterprise architecture, requirements gathering, cloud computing
- **Security:** information and network security, role-based access control, cyber law and ethics
- **Tools and Design:** Microsoft Office (Word, Excel, PowerPoint), Canva, CapCut, vector and logo design

EDUCATION

Bachelor of Science in Information Technology Graduated October 2026

Zambia University of Technology, Zambia

- **Final Year Project:** Designing and Developing a Personalized Diabetes Management System Using Reinforcement Learning (DiaSmart)
- **Programming and Development:** Introduction to Programming, Object-Oriented Programming, Data Structures and Algorithms, Web Design and Development, Human Computer Interaction, Fundamentals of Multimedia
- **Data and Systems:** Database Systems, Advanced Database Systems, Cloud Computing and Big Data, E-Commerce and ERP, Systems Analysis and Design, Object Oriented Systems Analysis and Design, Enterprise Architecture
- **Networking and Security:** Data Communications and Networks, Advanced Networking and System Administration, Information and Network Security, Computer Architecture and Organization
- **Management and Research:** IT Project Management, Entrepreneurship, Research Methods, Communication and Technical Writing, Social and Ethical Issues in IT

Grade 12 School Certificate 2020

Kamfinsa Day Secondary School, Kitwe, Zambia

PROJECTS

DiaSmart: Personalized Diabetes Management System Final Year Project, 2026

- Designed and developed a personalized diabetes management system that applies reinforcement learning to tailor support to the individual user
- Completed as the capstone of a BSc in Information Technology, covering requirements analysis, system design, development, and documentation

ZambiaPOS: Point-of-Sale and Inventory System Personal Project

- Built a full-stack POS and inventory management system tailored to Zambian businesses
- Developed the backend with Node.js, Express, and MongoDB, and the frontend with React and Tailwind CSS
- Implemented role-based access control separating administrator and cashier permissions

SchoolTrack Zambia: Pupil Progress and Report Card Platform Personal Project

- Product owner for a multi-tenant SaaS platform for pupil progress tracking and report card generation for private Zambian schools

- Defined requirements, specifications, and architecture, including school-level data isolation, role separation, and tiered Kwacha pricing by pupil count

EXPERIENCE

Freelance Graphic Designer Self-Employed

- Design logos and graphics for clients using Canva and vector tools, and edit short-form video with CapCut
- Delivered a logo design project for SmartEdge, an electrical company

Business Owner / Operator (School Business) 2022 - 2026

- Ran a business while studying, dealing directly with customers, handling sales, and managing day-to-day operations
- Built communication, time management, and customer service skills alongside full-time study
